**31st December 2024**

As a recent graduate from Islington College with a foundation in cloud computing, data analysis, and machine learning, I am eager to apply my skills to your organization. I am particularly drawn to roles that focus on innovation and data-driven solutions. I believe my technical expertise and passion for learning will allow me to contribute effectively.

During my academic journey, I worked on projects like developing an E-commerce web app using HTML, CSS, JavaScript, Servlet, JSP, and Java, following the MVC pattern. I also led a sales data analysis project for ABC Company using Python, NumPy, Pandas, Matplotlib, and Seaborn to ensure data accuracy and generate insights.

I hold certifications in AWS Academy Cloud Foundation, Data Analysis, and Machine Learning. My participation in activities like the Islington Web Development Club and ASPIRE 2022 has strengthened my leadership, teamwork, and problem-solving skills. I welcome the opportunity to discuss how my skills align with your needs. Thank you for considering my application.
